Jose Raul Rincon Garcia

Rice University
6100 Main St., MS-318
Houston, Texas, 77005

Ph.D. Candidate
Department of Civil and Environmental Engineering
e-mail: raul.rincon@rice.edu

EDUCATION

Rice University, PhD in Civil Engineering — Houston, TX, USA
Research topic: "Smart and Equitable Resilience Modeling of Dynamic Infrastructure Systems". *Advisor*: Jamie E. Padgett, PhD. — Degree expected 2025

Universidad de los Andes, Master of Science in Civil Engineering — Bogotá, Colombia
Thesis: "Seismic vulnerability assessment of reinforced concrete buildings using non-linear dynamic analysis". *Advisor*: Luis E. Yamin, PhD. — July, 2013 – June, 2015

Universidad de los Andes, Bachelor of Science in Civil Engineering — Bogotá, Colombia
Thesis: "Design's guide for buildings with Steel Plate Shear Walls". *Advisor*: Juan C. Reyes, PhD. — July, 2009 – June, 2013

GRANTS AND AWARDS

1st Place EMI Objective Resilience Student Paper/Presentation Competition, Engineering Mechanics Institute Conference and Probabilistic Mechanics & Reliability Conference (EMI/PMC2024) — May, 2024

2023 Robert P. and Eleanor Warden Shubinski Awardee, Rice University — Spring, 2023

2021 H. W. Reeves Endowed Scholarship Awardee, Rice University — Spring, 2021

Outstanding Journal Paper Award for 2018, ASCE Journal of Performance of Constructed Facilities. — January, 2020

Fulbright Scholar, Fulbright-Minciencias (Colombia). — August, 2019

Innovative Teacher Recognition, at Universidad de los Andes, Colombia. — June 20th, 2019

Mario Galan Gomez Scholarship, granted by ECOPETROL, Colombia. — 2009 – 2013

RESEARCH EXPERIENCE

Rice University — Houston, TX, USA
Ph.D. Candidate (PI: Jamie E. Padgett, PhD) — 2020 – Actual

- Develop resilience modeling approaches for multi-scale infrastructure systems that consider smart strategies to analyze low-probability events, compute metrics in multi-scale and heterogeneous systems, and cope with ever-changing conditions (such as aging, deterioration, or technology shifts).

- Propose methods to improve the science of measuring, comparing, and updating infrastructure systems performance to attain accurate, unbiased, and equitable estimates.
- Research on multi-scale uncertainty propagation aided by machine learning and statistical learning techniques for instant and long-term assessment of civil infrastructures, and continual learning.
- Develop use cases for the DesignSafe Cyberinfrastructure; evaluate interoperability between DesignSafe and INCORE through Jupyter Notebooks.
- Perform large-scale simulations using the high-performance computing capacities at the Texas Advanced Computer Center (TACC).

Universidad de los Andes Bogotá, Colombia
Research Assistant (PI: Luis E. Yamin, PhD) 2015 – 2017

- Participated in the development of a probabilistic methodology to include the soil response-related uncertainties in seismic hazard and microzonation studies; the case study was the Aburrá Valley (Colombia)
- Coordinated the development of a large-scale seismic risk buildings portfolio model for the Metropolitan Area of the Aburrá Valley to predict probable losses at community level
- Contributed with faculty and graduate researchers to develop an exposure model of Bogota's buildings for the risk assessment in the project SATREPS, directed by The Japan International Cooperation Agency-JICA and the Japan Science and Technology Agency -JST
- Evaluated and developed, as part of a consultant team, the national-scale seismic risk mitigation strategy in the Peruvian school infrastructure

Universidad de los Andes Bogotá, Colombia
Graduate Research Student (PI: Luis E. Yamin, PhD) 2013 – 2015

- Researched and collaborated in the development of a probabilistic methodology for seismic vulnerability assessment of buildings using part of the FEMA P-58 project results
- Collaborated in the site investigation, field and laboratory tests, and investigation of gathered information in a research case study of the collapse of a 27-story building in Medellin, Colombia
- Built the computational models for structural analysis and seismic assessment and the revision of the code-compliance (focused on structural design requirements) for residential buildings in Medellin and Bogota
- Planned, coordinated, measured, and processed the signals of noise and ground vibration produced by the blasting operations in a carbon mine in Colombia to identify its impact on the nearest communities

TEACHING EXPERIENCE

Rice University — Houston, TX, USA

Co-leading the Resilience Seminar of the Gulf Scholars Program at Rice University (GSP@RICE) — Fall 2022

- Developed the syllabus and co-organized the seminar sessions, co-curricular activities and the assignments for the seminar for the cohort '22.
- Co-lead the seminar sessions and engaged the students to find their future pathways extensions in the GSP@RICE and as change-agents.

Universidad de los Andes — Bogotá, Colombia

Full time Lecturer and Researcher (School of Engineering) — 2017 – 2020

- Lectured undergraduate courses:

  Structural Design: Leaded a total course re-organization by updating lectures and exams format focused on student-centered approaches. Collaborated in the development of a "Teaching notes book" — Aug. 2019 – Jul. 2020

  Mechanics of Materials: Updated and developed training material to improve students understanding. — Jan. 2018 – Jul. 2020

  Structural Analysis: Contributed to the development *TARSIS* platform, an online resource for student's assignments which uses the student's errors as a tool for self-learning. — Aug. 2017 – Jul. 2020

  Statics: Implemented flipped classroom methodologies as a tool for better understanding supported by the university's group for pedagogical innovation — Aug. 2017 – Aug. 2019

- Guided undergraduate (senior) research projects (required for bachelor's degree)
- Developed course contents, grading course performance and holding regular office hours.

- Contributed to research projects related to risk analysis on critical infrastructure such as bridges portfolios, buildings or educative infrastructure to develop action plans for risk mitigation
- Participated in the *Global Program for Safer Schools,* funded by the Global Facility for Disaster Reduction and Recovery - GFDRR.
- Motivated and investigated the implementation of innovative pedagogical strategies for student-centered learning approaches and the active engagement of the students.

STUDENTS GUIDANCE

Undergraduate students at Universidad de los Andes

- Laura Cristina Aguirre García (2018)
  Research Project Advisor. "Components' damage correlation and its impact to vulnerability".
- María Paula Delgado Enríquez (2018)
  Research Project Advisor. "Seismic community resilience: preliminary evaluation of two existing methodologies applied to school buildings".
- Karen Lorena Domínguez Tarazona (2018)
  Research Project Advisor. "Nonlinear dynamic analysis of isolated buildings".
- Juan Sebastián López Bello (2018)
  Research Project Advisor. "Design of isolated buildings with concentrically braced steel frames".
- Nicolás Parra Montaño (2018)
  Research Project Advisor. "Design of isolated buildings with reinforced concrete frames".
- Daniel Castrillón Campo and Astrid Natalia Gutiérrez Bernal (2019)
  Research Project Advisor. "Tool for approximation of bridge's super and substructure material quantities".
- Angie Paola Oviedo Castaño and Luis Felipe Huertas Medina (2019)
  Research Project Advisor. "Preliminary investigation of new seismic design paradigms in Colombia: structural design using uniform collapse risk".
- María Alejandra Ortiz Bernal (2019)
  Research Project Advisor. "Reinforced concrete frames subjected to tsunami loads".
- Juan Sebastián Parra Tarache (2019)
  Research Project Advisor. "Indirect losses in a simplified bridge network under seismic events".
- María Claudia González Clavijo (2019)
  Research Project Advisor. "Impact of existing approximate fundamental vibration period equations in the nonlinear dynamic analysis of combined systems.
- Andrés Felipe Jiménez Caro (2019)
  Research Project Advisor. "Linear performance analysis of tall buildings under seismic hazards".
- Gustavo Turriago Méndez (2019)
  Research Project Advisor. "Preliminary fragility function for adobe and rammed earth walls".
- Cristian Yesid Bula Peña (2020)
  Research Project Advisor. "Non-linear performance analysis of tall buildings under seismic hazards".
- Juan Camilo Vanegas Cañon (2020)
  Research Project Advisor. "Variation in design outcomes of tall buildings given the different existing approximate fundamental vibration period equations".
- Alejandra Clavijo Tocasuchyl (2020)

Research Project Advisor. "Analysis of collapse risk considering the uncertainties in the fundamental vibration period".

PROFESSIONAL SERVICE

Reviewer for Indexed Journals
Journal of Building Engineering
Journal of Performance of Constructed Facilities

Professional Technical Committees
ASCE Civil Infrastructure and Lifeline Systems Committee (member since 07/2021)
ASCE Risk and Resilience Measurements Committee (member since 07/2021)

Additional Professional Memberships and Activities
Earthquake Engineering Research Institute (EERI), Member
American Society of Civil Engineers, Member
Colombian Association of Earthquake Engineering (Colombia), Member

UNIVERSITY SERVICE AND CONTRIBUTIONS

University Service

- Member of the Strategic Planning Committee for articulation of Rice's vision for the next 10 years (sole representative of graduate students 2023-2024)

Participation in Student Clubs as a Graduate Student at Rice University
Participated in the following clubs (period mentioned in parenthesis):
President, Earthquake Engineering Research Institute – Rice University (2021 – present)
President, Civil and Environmental Engineering Graduate Student Association (2023 – present)
Officer, Civil and Environmental Engineering Graduate Student Association (2021 – 2023)
Officer, Colombian Owls Student Association (2023 – present)
Officer, Latin American Graduate Student Association (2022 – 2023)
Leader of 'The Fulbright Ring' - Fulbright at Rice (2022 – 2023)
Departmental Liaison Center for Teaching Excellence Graduate Advisory Board (2022 – 2023)

CONSULTING & PROFESSIONAL EXPERIENCE

ITEC- Ingeniería Técnica y Científica Bogotá, Colombia
Project Specialist 2013 - 2017

- Evaluation of Ecuador's seismic risk profile at the country level. (Client: Inter-American Development Bank - IDB).
- Technical assistance to the World Bank and the Government of Ecuador in structural and construction engineering in support of the response to the April 16th, 2016 Ecuador earthquake (Client: World Bank).
- Exceedance loss curve for frequent events in Honduras (Client: Inter-American Development Bank - IDB).
- Condition and safety level of the foundation of the 15,000-ton cement silo (Client: HOLCIM-Colombia)
- Condition and safety level of the 20,000-ton Clinker Silo (Client: HOLCIM-Colombia)

- Assessment of the disaster risk in Colombia as part of the risk financing and insurance program (Client: World Bank).

CIVECO S.A.S Bogotá, Colombia
Co-Founder and Project specialist 2016-2017

- Consultancy projects focused in the vulnerability assessment of structures
- Design of residential and commercial low and mid-rise buildings
